# Promoting Honey Bee Health

## Why does Honey Bee Health Matter?

The Honey Bee is responsible for **1 out of every 3 bites** of food we eat

Nearly 100% of Almonds are dependent upon Honey Bees for pollination

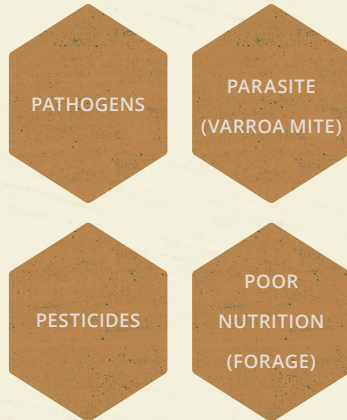

Honey Bees pollinate **90 different crops**

## Challenges Facing the Honey Bee

**40%** of Honey Bee colonies die annually

### 4 Main causes

## Flagstone Foods' Commitment to the Honey Bee

We are on a mission to source

**100%**

of our almonds from bee-friendly farms by 2025

## What does it mean to be a "Bee-Friendly" Farm?

Providing resources for pollinators by dedicating **3% or more of farmland to habitat**

Protecting bees and other pollinators by **mitigating the impacts of pesticides**

Providing nesting sites and responsibly managing hives

Partner with Flagstone Foods to help support your sustainability program and improve bee health.

Flagstone Foods can assist you with **sourcing and marketing** of bee-friendly almond products.
